

My Name _____

My Partner's Name _____

First:

Spend some time thinking about the kinds of questions you want to ask your partner. Think of questions that **don't require** a yes or no answer. You want to get to know lots of details about your partner. The more details you know the richer your paragraph will be. Make a list of 7-10 questions. You can always add more during the interview. Write your questions on looseleaf paper. Remember you can type, hand write, or record your interview.

Second:

Write your paragraph describing your partner. Be sure to read over the writing lab directions to make sure you are including the writing lab details.
